

# European Regional Conference 2009

Voisin law firm invite you to the European regional conference in Jersey on 3-4 April 2009.

Voisin is one of Jersey's oldest law firms, with particular expertise in commercial matters, including the use of Jersey trusts, companies and partnerships, banking, structured finance, collective investment funds and employee benefits. Our litigation department has substantial experience in all matters that come before Jersey's courts, as well as dealing

with arbitration cases. Our Property Law team handles all types of commercial and residential property work. We also deal with probate and estate work and family matters on behalf of our private clients.

We are renowned for offering a high quality of service and pragmatic advice on all legal and commercial matters in Jersey.

Jersey is known as the Jewel in the Crown of Great Britain: the Island is the most southerly of the British Isles, located some 160 km south of mainland Britain yet only 22 km from the coast of France. Despite its small size (14 by 8 km) all your senses are made to work overtime in this tiny island. Jersey is a leading international finance centre with its own government and laws that make it autonomous from the English Parliament, but loyal to the British Crown.

**We hope that this has given you a 'taster' and that you will be able to join us next April.**

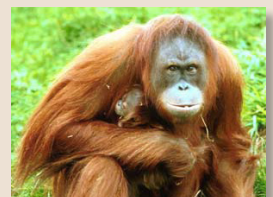

For further information on the event or to register your interest, please contact our Head of Marketing, Georgina Jeffries, by email [georginajeffries@voisinlaw.com](mailto:georginajeffries@voisinlaw.com) or by telephone +44 (0)1534 500441.

The two-day event will be held at the Atlantic Hotel, one of Jersey's finest hotels. A member of the Small Luxury Hotels of the World, the Michelin-starred hotel boasts views over St. Owen's Bay to the Atlantic ocean and the neighbouring La Moye Championship Golf Course.

## BEHIND THE SCENES AT DURRELL

The conference will include a 'behind the scenes' visit to Durrell, Jersey's world-renowned endangered species breeding centre. A guide will accompany guests around areas normally out of bounds to the public, including at least one "experience" to prepare an animal feed, get up close to an animal or enter an enclosure.

A Spouse's tour will be offered. Spouses will join the delegates after the morning conference on the second day to attend the 'behind the scenes' visit to Durrell.
